The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 11/1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by German pat. '910 to Berger. Berger's harness is capable of being used as a rescue harness.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 and 11/1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nun in view of Hengstenberger et al or Schweer. Nun shows the claimed harness with the exception of the fixed loops. Hengstenberger shows a harness with an upper body loop 14 having a fixed connection means at 12 at the juncture of his smaller loop 16 to enable none adjustable loop portions. Schweer in fig.8 shows arm loops having a fixed connection means at the juncture of his drag portion. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the harness of Nun to comprise a fixed

connection means at the juncture of his body loops 14 and smaller loop 18, as taught by either Hengstenberger or Schweer, in lieu of his connection means 13, to enable non adjustable loop portions.

The status identifier of claim 11 should be corrected as claim 11/7-10 are withdrawn.

Claims 7-10 and 11/7-10 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/29/05.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will

be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
